IXIS Commissioning Training

"General and Project"

The training for Commissioning activities is separated into **two main different approaches**.

- **The general Commissioning Training** consists in the Commissioning as per Ixis Methodology.

- **The Commissioning Training for projects** is dedicated to project with Ixiscom software tool associated to.

« The training is a major step to make people fully understanding to the Commissioning activities »

1- GENERAL TRAINING

This training is organized through our Commissioning Methodology by Ixis.

The objective is to be aware of the terms, functions, organization, scheduling ... and to give an homogeneous understanding of the commissioning as per **Ixis Commissioning Methodology.**

This training is a general one and can be adapted to a group of commissioning people (by level too).

2- PROJECT COMMISSIONING TRAINING

A training for dedicated project is specifically organized.

It concerns Commissioning management people, Commissioning Site Leader and Discipline leaders.

A training for the Commissioning Ixiscom software is

performed with integration of the project data.

IXISCOM SOFTWARE

« The IXISCOM software is a commissioning tool integrated into the method making it possible to achieve the objectives of the IXIS Commissioning Methodology. »
